EDUCATION

University of Engineering & Management

B.Tech in Computer Science and Technology

Relevant Coursework: Data Science, Object-Oriented Programming (OOPs), Database Management (DBMS)

Kolkata, India

Aug 2022 – Jul 2026

Amrita Vidyalayam

Senior School Certificate Examination (Class XII) – CBSE

Kolkata, India

Mar 2022

TECHNICAL SKILLS

Programming & Frameworks: Python, Java Script, SQL, FastAPI, Django

Cloud & Databases: AWS, MongoDB, MySQL, PostgreSQL

Libraries & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, BeautifulSoup, Requests

Web Scraping & Automation: BeautifulSoup, Requests, Selenium, Playwright, Pyppeteer, Asyncio

Data & BI Tools: Excel, Google Sheets, Power BI, Cognos

INTERSHIPS

OGGANGS Pvt. Ltd. | Software Engineering Intern | [LINK](#)

Dec 2025 – Present

- Engineered automated Selenium, playwright, Pyppeteer, and BS4 pipelines to extract and sanitize 2.5M+ records, while performing software, web, and automation testing to validate functionality, ensure accuracy, and maintain system reliability
- Built and deployed multiple Django microservices with isolated modules for data extraction, processing, and management, enabling independent scaling and reducing inter-service dependency across the system.
- Developed end-to-end data pipelines in Python and Django to handle large-scale ingestion, transformation, image processing, and third-party API integration, delivering structured and production-ready data for business operations.
- Designed and maintained backend services that integrated external APIs, custom parsers, and automated processors to handle complex data workflows and reduce manual operations across the platform.

HUMANS OF FOOTBALL | Data Analytics Intern | [LINK](#)

May 2025 – Aug 2025

- Systematized 5,000+ record analysis using Python, Pandas, and Excel to increase reporting accuracy and speed, enabling faster and more informed decisions by senior stakeholders across the organization.
- Built 10+ Power BI dashboards visualizing player metrics, enabling real-time leadership decisions across events and recruitment cycles.
- Executed A/B testing on recruitment and event formats, identifying improvement areas resulting in a 20% increase in operational efficiency; findings were presented directly to senior leadership.

PROJECTS

HackVerse | FastAPI, Python, Tailwind CSS, shadcn UI | Group Project | [LINK](#)

8th Semester – UG

- Developed 15+ FastAPI endpoints for AI microservices to automate data flow and generate real-time responses, forming the core backend engine of the platform used by cross-functional teams.
- Integrated backend REST API routes with the frontend, reducing cross-platform communication errors by 25% and improving overall reliability across all platform modules and stakeholder touchpoints.
- Architected a Python AI microservice for automated room allocation, reducing manual scheduling workload by 30%; designed full UI with Tailwind CSS and shadcn delivering a modern user experience.

BookIQ — Document Intelligence Platform | Django, React, ChromaDB, Selenium Groq LLaMA, RAG | [LINK](#)

8th Semester – UG

- Built a full-stack RAG pipeline integrating ChromaDB vector search and Groq LLaMA models, enabling AI-powered Q&A with source citations across 300+ scraped books.
- Engineered an automated multi-page scraper using BeautifulSoup and Selenium to extract book metadata at scale, generating AI-driven summaries, genre classification, sentiment analysis, and key themes via LLaMA 3.1 8b.
- Architected 5 REST API endpoints with 24h response caching, overlapping chunk strategy for optimized RAG recall, and embedding-based similarity recommendations via sentence-transformers — deployed with a responsive Tailwind CSS frontend.

Payment Fraud Detection | Python, Scikit-learn | Model: Random Forest | [LINK](#)

6th Semester – UG

- Implemented a Random Forest model on 280,000+ real-world transactions achieving 98% ROC-AUC and 0.92 F1-Score; engineered 15+ predictive features including amount, frequency, and location signals.
- Investigated thorough EDA and data cleaning to resolve quality issues, synthesized features to significantly reduce false positives and improve model training quality and generalization capability by 35%.
- Generated 5+ fraud dashboards, speeding anomaly detection by 40% and enabling the fraud review team prioritize high-risk cases.

LEADERSHIP & ACHIEVEMENTS

- Volunteer Lead (Humans of Football): Managed 10+ cross-functional interns to plan and execute 5+ high-traffic regional sports events, boosting player participation by 20% through targeted data-driven outreach.
- Coordinated between event, analytics teams, and senior management for seamless delivery, showcasing leadership, cross-team collaboration, and stakeholder communication skills.
- Award: Recognized for highest event conversion rate and record-breaking attendance at regional sports meetups, reflecting strong execution, ownership, and results-oriented approach under pressure.
- Certifications: Edunet Foundation – AI/ML with IBM SkillBuild | Database for Developers – Oracle

ADDITIONAL INFORMATION

Languages: English (Professional), Hindi (Advanced), Bengali (Native) **Interests:** AI/ML (Predictive Modeling), Quantitative Analytics, Competitive Football, Strategic Chess
